

DIGITAL ACCESS TO BMI

Greetings from home office,

Date: 11/25/2021

As the world makes progress towards defeating the pandemic, humanity has globally embarked on gaining environmental consciousness towards a green planet.

The Pandemic has accelerated business communications and transactions into the digital era. As a global citizen, BMI is willingly making part of this necessary adjustment.

USE OF THE BMI PORTAL

Our corporate policy has shifted to a paperless environment. It is imperative that agencies and agents, guide every new and existing client into individual registration and use of the BMI Portal. Adapting to the dominating digital era is a process that meets occasional resistance from some clients. Digital access and tools only alleviate administrative work, reduce errors, and avoid expenses to agents and agencies alike.

Using their own secret Username and Password, clients have *legitimate and direct access to the company and their policy*. The Portal is giving every client *the power* to pay directly, print receipts, and more importantly, ***print their own policy from the original source.***

E.CERTIFICATE

Understanding the sensitivities of the pandemic and attending the desire to have a *tangible document*, now clients have access to the **E.certificate** thru the BMI Portal.

The **E.certificate** is *not a binding document*. It is a certification that *does not replace the legality of the contract*. This document certifies *in real-time* that the policy in question is paid and active at the specific time of search and print.

We encourage every BMI client to access the legitimate BMI Portal and personally print their own **E.certificate**.

THE FUTURE

We will be monitoring and testing the digital access and use of the **E.certificate** to see how this new tool can better satisfy your market's idiosyncrasies to a higher level.

NICOLAS MUNOZ
BMI Asia Director
